Assignment (1) Soft skills

🞣 Who am I?

Ahmed Fathy Kamal, a second-year student at the Faculty of Commerce, Cairo University.
I have a strong passion for data analysis and business intelligence (BI), and I am currently focused on developing the analytical skills necessary to support strategic decision-making.
My professional ambition is to work as an SAP Consultant, specifically in the Business Intelligence (BI) module, where I aim to connect knowledge with advanced technical solutions.

🞣 My journey in building my career.

My journey in the search for self and then knowing the values that I possess, and in what field I can employ them. Then I discovered myself in the field of accounting and auditing, based on my own values (objectivity - meticulousness - logical analysis of numbers). Following that, I began to think about searching to know the jobs that an accountant can fill and what the labor market requires, and the demands, so that I can keep pace with the labor market and its requirements in the field of accounting and auditing. After searching, I found the plan that suits the values I possess in order to become an SAP Consultant (BI), and it is sequenced as follows...

1) First, enroll in the College of Contracting, then specialize in the Accounting Department, Financial Accounting Division, and review part of it for accounting basics and accounting principles .
2) Learn more about ERP systems, their specializations, and the requirements for each module.
3) Studying the requirements for each Module to join and work with it, and then discovering the requirements of Module(BI).
    - A deep understanding of financial accounting and auditing, enabling the ability to comprehend accounting figures.

    - A grasp of data fundamentals, data analysis, and problem-solving skills (statistical and mathematical fundamentals - SQL,.......).

- Attention to detail.

- After analyzing data, the ability to identify the underlying reasons for the accounting figures and use these figures to support senior management in making critical decisions.

4) Practical application of projects (training that simulates real-world work in companies - Freelancing)
