

Assignment 1 – Professional Bio

Q1: What type of clients or industries do you enjoy working with the most?

A1: I enjoy working with businesses that want to make better decisions using data, especially in finance, retail, sales, and business operations.

Q2: What makes your work different from other freelancers?

A2: I focus on understanding the client's business needs before starting the analysis. I always provide clear insights, interactive dashboards, and practical recommendations instead of only presenting data.

Q3: What are your future career goals?

A3: I aim to become a professional Business Intelligence and Data Analytics consultant while continuing to help businesses improve their performance through data-driven solutions.

Professional Bio

I am a Data Analyst and Accountant who helps businesses transform raw data into meaningful insights and smarter decisions. I specialize in Power BI, SQL, Python, Excel, and financial analysis, and I always focus on delivering accurate and practical solutions. I am currently working as an Audit Requests Assistant while completing professional data analysis projects through the Digital Egypt Pioneers Initiative. I worked in auditing, banking, sales, and marketing, which gave me a strong understanding of business operations. I have completed several real-world projects and have successfully delivered freelance services to different clients. I have been continuously developing my analytical and technical skills through hands-on experience and continuous learning. With a strong background in accounting and business, I am passionate about solving problems and creating dashboards that support better decision-making. My goal is to build long-term partnerships by providing reliable, high-quality data solutions. If you are looking for a dedicated professional who combines business knowledge with technical expertise, feel free to contact me.
